Creating an easyMarkets MT4 account

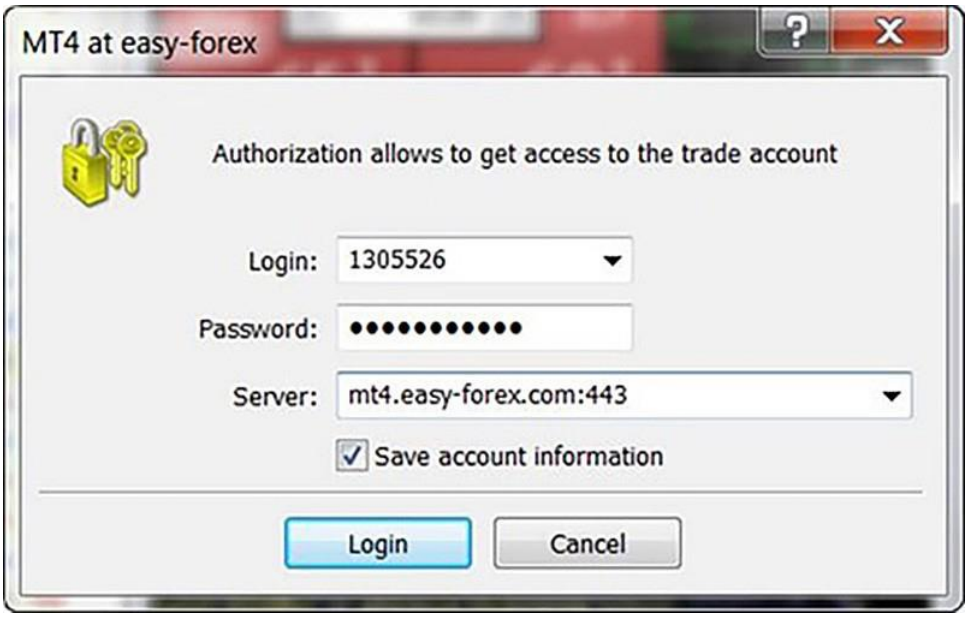
To create an MT4 account, you must already have a funded easyMarkets account. Click here to register for your easyMarkets account.

Log into easyMarkets and go to Menu -> My Profile -> My Account. Here you can automatically set up your MT4 account and be emailed your login credentials.

If you do not have the MT4 platform already installed on your system, go to the section below on how to download and install it.

Already have MT4 installed?

If you already have the MT4 platform installed on your computer, you do not need to download it again. Simply login via the following server Mt4.easy-forex.com:443 using your easyMarkets MT4 account login details.



How to download, install and create a demo account

1. To install the Metatrader platform you can download from

https://download.mql5.com/cdn/web/blue.capital.markets/mt4/easyforex4setup.exe

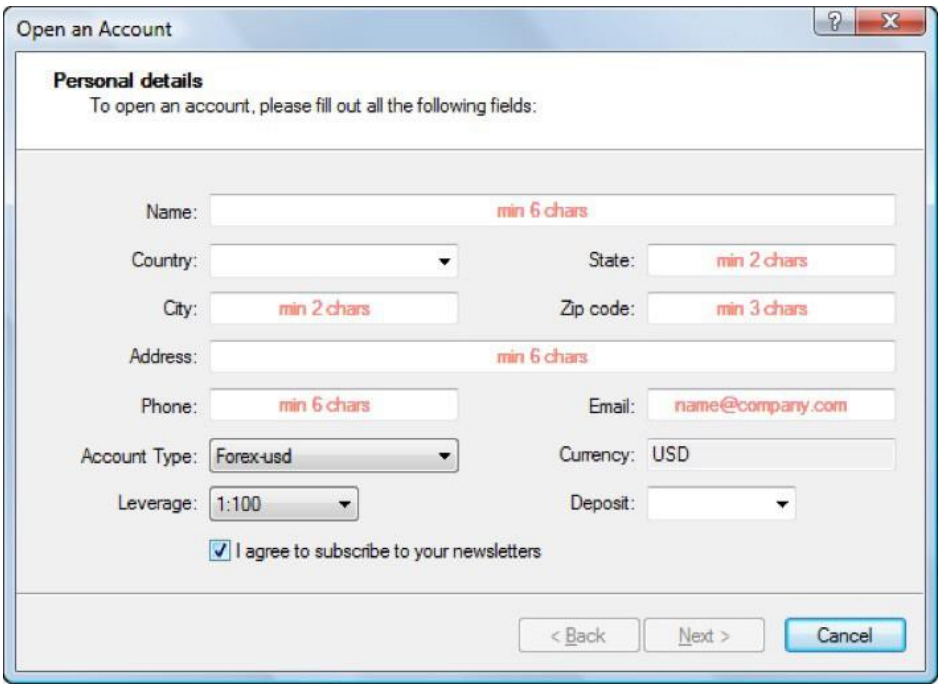
2. After downloading the file, please run and install
3. After installing the software, the terminal will be launched automatically by default
4. To open a demo account, please follow the steps below

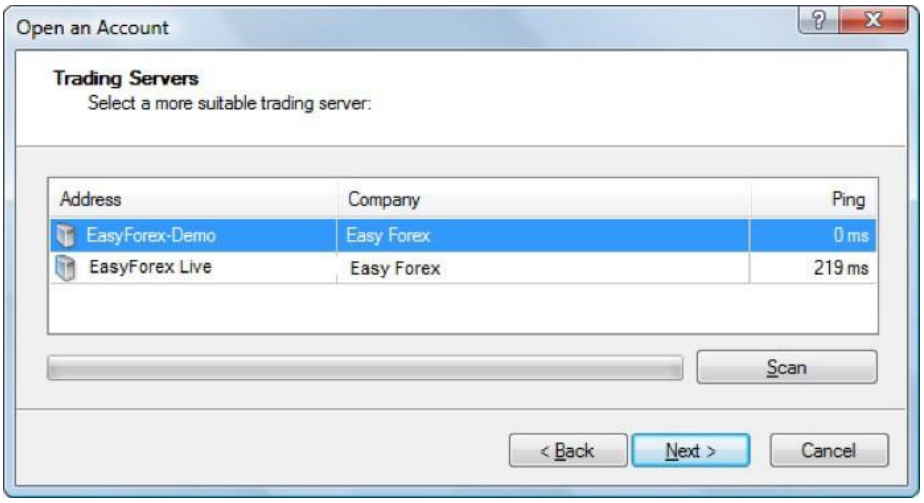
a. Fill your details as per the box below

b. Click Next

c. Choose EasyForex Demo Server

d. The system will provide you with a Username and Password for a demo Account



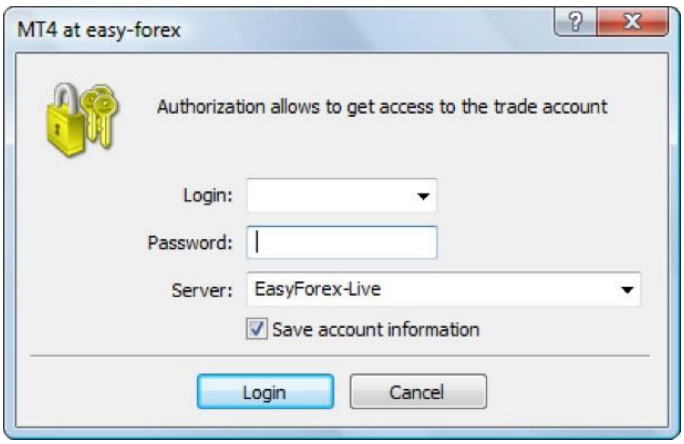


How to get and login to a live account

5. Please contact your relationship manager to open a real MT4 Account or you can create your account from the My Account section of the website.

I. Automatically receive your username and password by email when the account is created.
II. Login to a live account, please go to File/Login

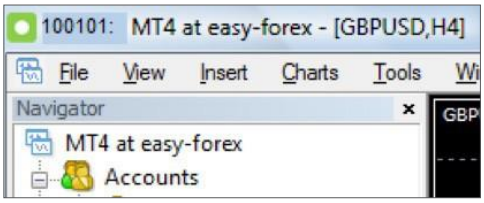
6. Enter your USER ID, Password and Choose: EasyForex-Live Server.

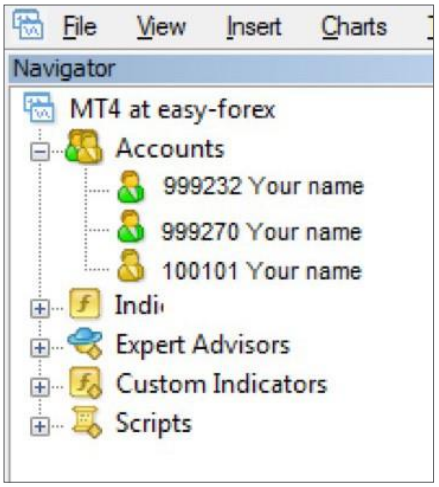


Accounts Navigator

1. A Green Icon Account shows a demo account
2. A Golden Icon Account shows a Real Money Account
3. You can log in to different accounts by double clicking on the account and then confirm
4. To know which account, you are currently logged in to, please note the account number on the LEFT TOP CORNER of the MT4 application
5. Looking at the BOTTOM RIGHT corner the status bar will show the current connection stats.

Invalid Account means the User ID or Password is wrong. A flowing number with "kb" means connection has been established and data is flowing





Depositing and withdrawing funds

Log into your easyMarkets account and got to My Funds in My easyMarkets. From here you can deposit and withdraw directly into either your MT4 account or your easyMarkets web account. You can also transfer funds between both accounts. If you have any difficulties be sure to contact your relationship manager or our customer support team.

To ensure the smooth process of your withdrawal please ensure you have submitted the following documents to easyMarkets:

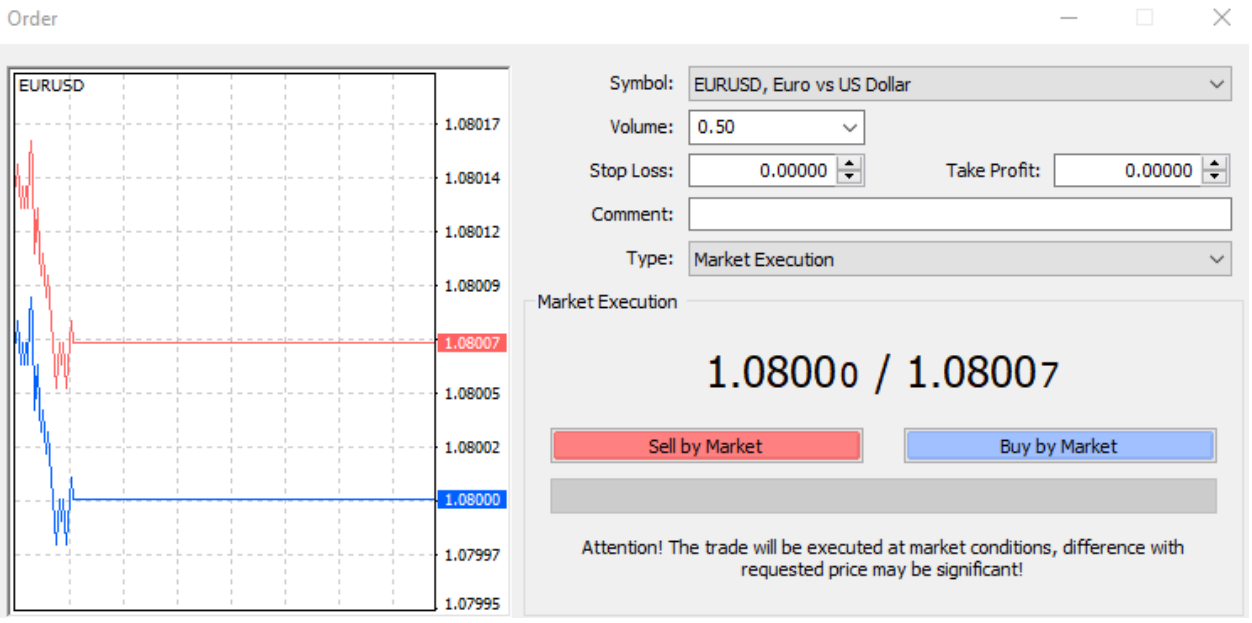
- a copy of your ID with recent photograph
- a copy of a recent (within 6 months) utility bill or bank statement showing proof of residential address and your full name
- Other documents, such as credit card statement may be required depending on your account activity. If these are required, we will contact you.

Making your first trade

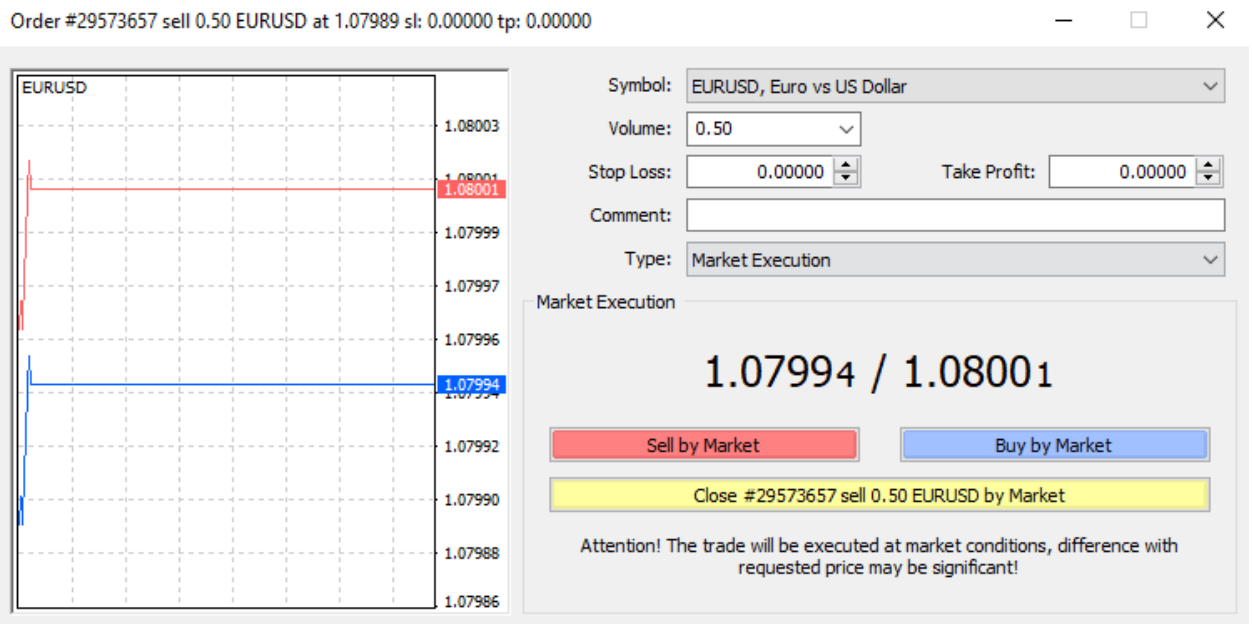
There are two main methods to open trades on your MT4 account. The first is manually selecting the currency pair and lot size and the second is using the One Click Trading method. Below is a quick guide to opening trades by both methods.

Manual opening.

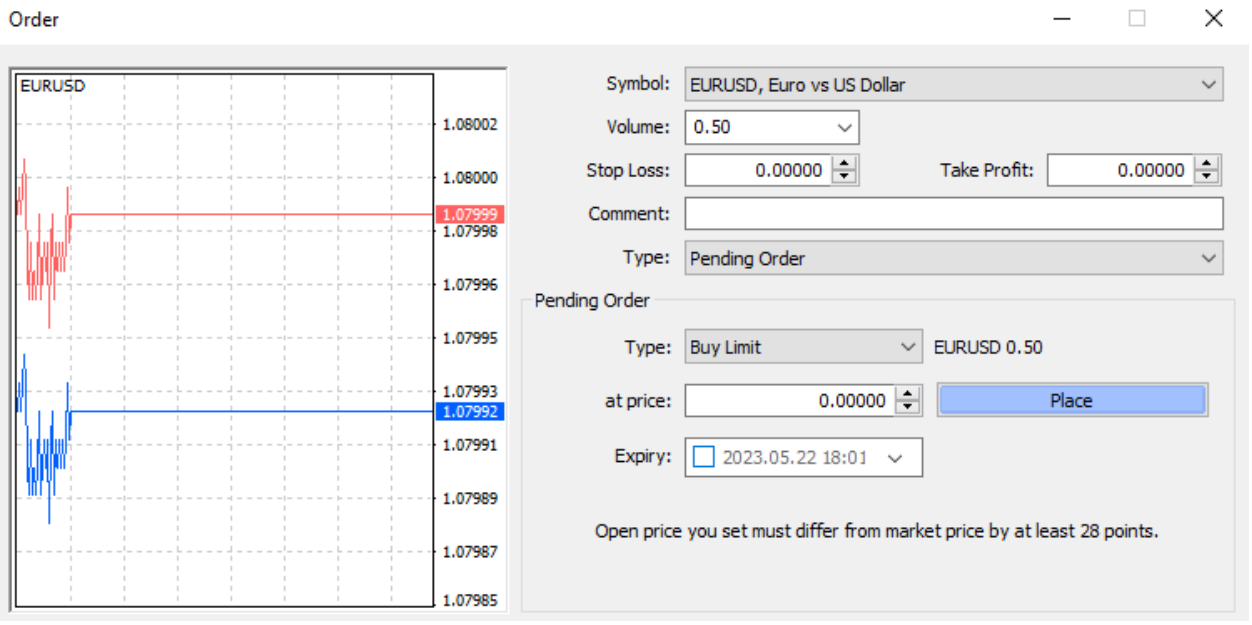
1. Double click on any currency on the Market watch to bring up the below window.



2. If you are not satisfied with currency pair, please choose the required currency pair
3. Choose the Volume. For Standard accounts you can trade with a minimum volume of 0.01 until 50 lots.
4. Choose market execution to place market order which will be filled on MARK T.
5. Click Buy or Sell



7. If the order was not filled, you will receive an Off-Quotes response
8. To place a pending order that will be executed at a certain require price, choose Pending

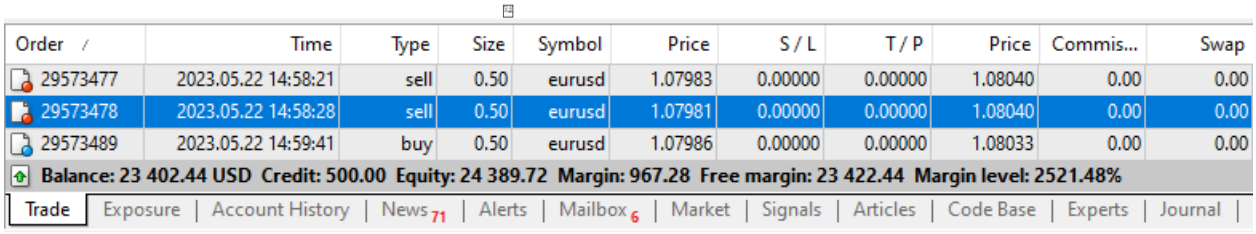


How to Close or Modify an open Order (Position)

1. Press Ctrl+T to toggle and untoggle the Terminal

2. To modify a deal, Stop loss or Take Profit, double click on the required field and enter your new stop loss or take profit

3. To Close a deal double click anywhere else on the deal except T/P or S/L and click close to confirm



Order	Time	Type	Size	Symbol	Price	S / L	T / P	Price	Commis...	Swap
29573477	2023.05.22 14:58:21	sell	0.50	eurusd	1.07983	0.00000	0.00000	1.08040	0.00	0.00
29573478	2023.05.22 14:58:28	sell	0.50	eurusd	1.07981	0.00000	0.00000	1.08040	0.00	0.00
29573489	2023.05.22 14:59:41	buy	0.50	eurusd	1.07986	0.00000	0.00000	1.08033	0.00	0.00

Balance: 23 402.44 USD Credit: 500.00 Equity: 24 389.72 Margin: 967.28 Free margin: 23 422.44 Margin level: 2521.48%

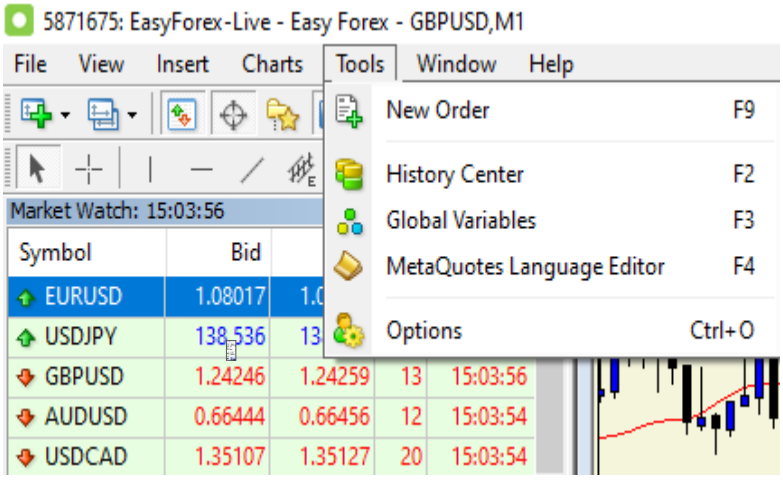
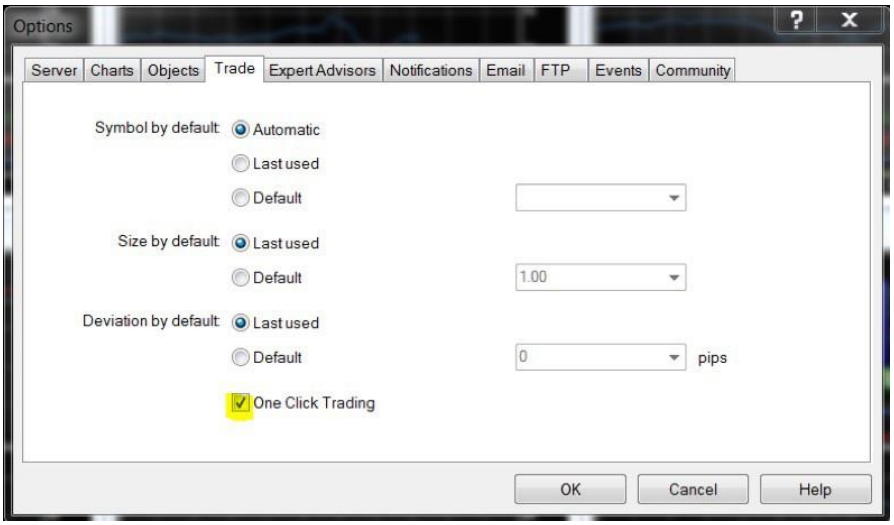
One Click Trading

To use one click trading follow the instructions below.



1 Select one click trading and select the default deal size you wish to use.

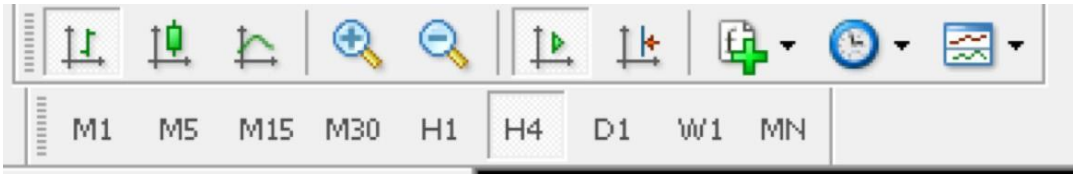


2. Now to enable one click trading on your graph you need to click on the downward facing arrow in

3. You can then click on SELL or BUY to open the deal with the selected Volume.
4. To close the position with one click trading simply click on the “X” in the right corner of the Terminal tab.

Charts & Indicators

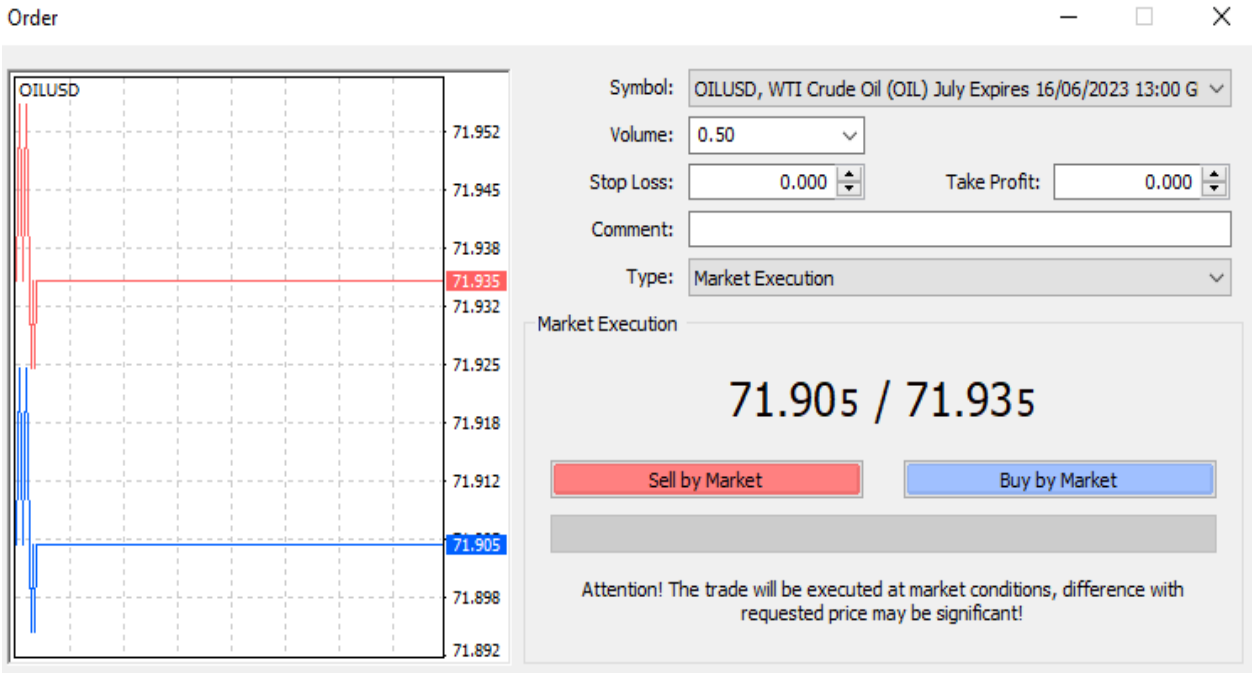
1. Drag and drop a currency pair from the market Watch window into the charts window to view the chart of that pair
2. Click on periodicity on top of chart to change the period
3. Click on Type of chart to toggle between Line, Bar and Candle Sticks
4. You can use the below tools to enhance or modify your chart



5. To add a study or indicator, Go to Insert/Indicator then choose the required indicator.
6. To add an expert advisor drag and drop the advisor from the Navigator Window
7. Click on Allow Live Trading to allow the EA to take trades
8. Click on the PLAY button on the Top part of the application to Enable the EA and start it

Swap Rates

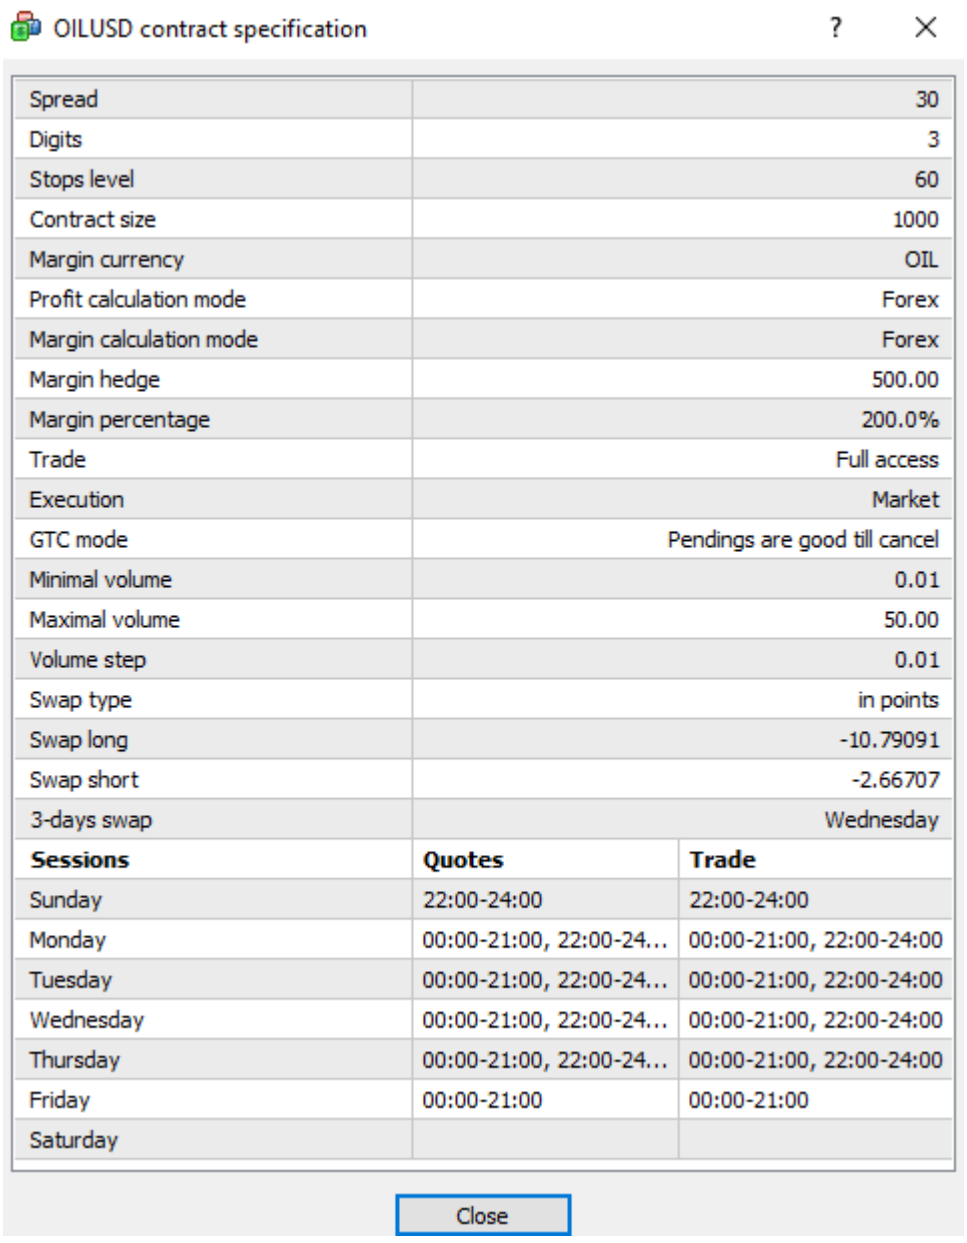
Your deals remain open until you close them, or your Stop Loss or Take Profit order is triggered, or your margin drops to or below 30% (*50% for EU AU Clients). Commodities, Future Indices, Energy Products, Copper, have an expiry date set and will close automatically at the specified date and time. To check the expiry date of any CFD, place your mouse over the symbols and the expiry date and time will be displayed. Another way to check the expiry date, is by double clicking on the instrument.



To view the currency interest table and check your swap rates, leverage and trading hours:

1. Right click on the chosen symbol in the Market Watch
2. Select Specification

You will now see all the relevant information regarding selected symbol.



Calculating maintenance margin

Maintenance margin is the amount of money required to open and maintain a position. It is regarded as a goodwill that is reserved aside. The higher the leverage, the lower is the goodwill amount.

With a leverage of 1:200, the margin will be equal to 1/200 x 100% (0.5%) of the value of the position.

Stop Loss: When stop loss is reached, the deal will be closed automatically provided the trader has defined a stop loss. However, in the case that there are deals that have no stop loss, they will stay open as long as the margin level is above a predefined value by the broker. Once it goes below this level, deals will be closed automatically starting with least profitable ones

Margin level is defined as: equity divided by margin x 100
